Re: 2020/2363/P, 106 South Hill Park

Dear Sofie,

The Design and Access Statement fails to mention that the rear garden of no. 106 South Hill Park is designated as Biodiversity Corridor E in the Hampstead Neighbourhood Plan, as identified in Appendix 4 (excerpt below).

Policy NE3 states that proposals for property that include part of these corridors should not diminish the ability of the corridor to provide habitat and the free movement of wildlife. "Subject to their scale and location, proposals should establish the quality of the existing biodiversity through relevant ecological appraisal and species surveys. Applicants should show in their proposals how they plan to enhance both biodiversity and habitats."

While the extension may not reach the biodiversity corridor, no plans for landscaping have been submitted or any tree survey that would show that existing trees will be protected by the extension and any possible hard landscaping. The loss of garden cannot be mitigated easily by a few square metres of green roof and our opinion is that more needs to be done to support biodiversity in order to be consistent with Policy NE3.

The Forum is also concerned by providing a door to the extension roof, which would facilitate use of the roof as a terrace.

Sincerely,

Janine Griffis  
Hampstead Neighbourhood Forum
